# MiscRes: Factory Instruction Sheets

Below are listings of instruction sheets from the MoCo.

Most instruction sheets come in the package along with Parts and Accessories you'd buy from them.

Many are also available for free download or printing from the [SIP Portal on the Harley Website](#).

You can enter an instruction sheet number or a part number in the search box and then view or print the instruction sheet from there.

Or you can view download the ones below which have particulars on the subject matter already shown. Instruction numbers that only have a "J" character followed by numbers are the actual instruction numbers.

Instructions starting with a "JX" are generally original versions before the "J" system was introduced.

The "JX" instruction number will not show up in a search from the SIP portal.

The "J" instruction numbers will show up if they are still being published by the MoCo.

The instructions show what parts are needed for certain kits / upgrades as well as particulars for installation.

Some parts may be on a used bike you purchased that don't show up in the parts catalogs but may be in the instruction sheets.

Also, there are NOS parts available online from different sellers that you may not know exist.

## Engine Mechanicals - Top & Bottom End
