BQuazy Heel-Toe Shifter

The BQuazy logo is engraved on most of them. However, they be purchased without the logo upon request. ⁶⁾

Made in USA, the design was a need for someone who has drop foot. ⁷⁾
With which they were unable to lift their toe in a normal shifting motion.

It can be caused by nerve damage in the knee area. ⁸⁾

This heel toe shifter allows them to shift without causing pain and discomfort by allowing them to shift in a downwards motion.

Making it so everyone can ride comfortably is a excellent idea.
