# L84-85 and 86-90 Oil Filter Mount Comparison

### Side by side comparison

## **Line routing**

**L84-85** (filter on the return part of the oil system)

#### 86-90:

(filter on the feed part of the oil system)

86-90 Oil Filter Pad <sup>3)</sup>	Thread sizes. 4)
------------------------------------	------------------

### Oil filter adapter

#### L84-85

Filter adapter (33115-79):

The oil filter adapter threads are the same size from L84-90.

Both ends have the same I.D. with a single hole drilled straight through.

The check valve in 85 and prior models is in the oil pump.

Therefore, the filter adapter is not set up for the check valve.

#### 86-90:

Filter adapter (33116-86):

Both ends have different I.D.s for use with either a check valve or a check ball.
