### Wheel Truing / Balancing

\$5 wheel truing stand <sup>1)</sup>

For balancing, use old worn wheel bearings, not notchy, with WD40 for lube. Nice free movement. <sup>2)</sup>

For lacing: To get the initial spoking nice and centered, drill a hole on your work bench for the axle, scribe a circle where the rim goes and locate it with wooden blocks screwed to the bench. Wooden shims provide the correct offset. <sup>3)</sup>
