## REF: Tools - 132

### Shop Press

Can be made from whatever you find at the scrap yard, this was made from steel channel bolted to the 2x4s.

Then, a couple pieces of steel bolted to the bottom of the bottle jack (one with a hole in the center of the jack

to hold a 3/8" socket drive to which I can attach whatever size socket or adapter needed to press on a bearing). Then under that is another piece of steel to spread the load a bit <sup>1)</sup>
