Tool Boxes / Tool Storage

Tool Bag

Pretty much everything you need to assemble / disassemble, tune etc. your Sporty can be kept in one carry on bag. ¹⁾

Then you can just grab it and everything is there tool wise with the exemption of some specialty stuff that's just too big.

(or that you don't use often)

The nice thing about this is if you break down somewhere and catch a ride later to go fix it along side the road,

Just grab the bag and no wondering if you grabbed the tools you need.

You can carry spare carb parts, jets, seals, exhaust gaskets, thread lock, anti seize, spark plugs & etc. in there.

Tool bag strictly for Sportster tools. ²⁾
