

Replaces Bulletin No. 462

SPEEDOMETER INFORMATION / ELECTRA-GLIDE AND SERVI-CAR

1000 rev./mile design speedometers were used on the 1962 and later Duo-Glide, Electra Glide and Servi-Car models. Formerly, the speedometers used on these models were driven at 2000 rev./mile. To accommodate the change in speedometer gearing, the speedometer drive gears and cables also were changed. This change in speedometer gearing was made to give greater durability of the speedometer, drive gears and cables, resulting from reduced operating speed.

INTERCHANGEABILITY

The 1962 and later speedometers, drive gears and cables, as individual parts, are not interchangeable with the 1961 or earlier parts. In other words, the 1962 and later speedometer will not work on 1961 and earlier models or vice versa. Similarly, the 1962 and later drive cables and drive gear will not work with 1961 and earlier drive cables and drive gears (in FL-FLH transmission and Servi-Car rear axle).

CAUTION: Mismatching speedometers and drive gears will result in damaged parts.

SPEEDOMETER IDENTIFICATION

Speedometers are identified with a manufacturer's serial number printed on the back as shown in the table.

GEAR IDENTIFICATION

Drive gears, as furnished for parts order, have different finishes so that they also are readily distinguishable.

SERVICE PARTS INFORMATION

Use the information listed in the chart on the next page to identify and order any speedometer and speedometer drive replacement parts.

NOTE: When ordering any assemblies which include parts shown in table, such as Drive Cable & Core, Driven Gear & Housing, Countershaft Gear Assembly or the complete Transmission, be sure to use the Parts Catalog to correctly specify part numbers.

HARLEY-DAVIDSON MOTOR CO.

DUO-GLIDE	1948 To Early 1961	Late 1961 * (See Note Below)	1962-68	1969
SPEEDOMETER HEAD (Standard)	Part No. 67004-53A Mfgs. No. 509FE	Part No. 67004-53A Mfgs. No. 509FE	Part No. 67004-62 Mfgs. No. 540G	Part No. 67004-68 Mfgs. No. 540 AL
