

This Bulletin Supersedes No. 495

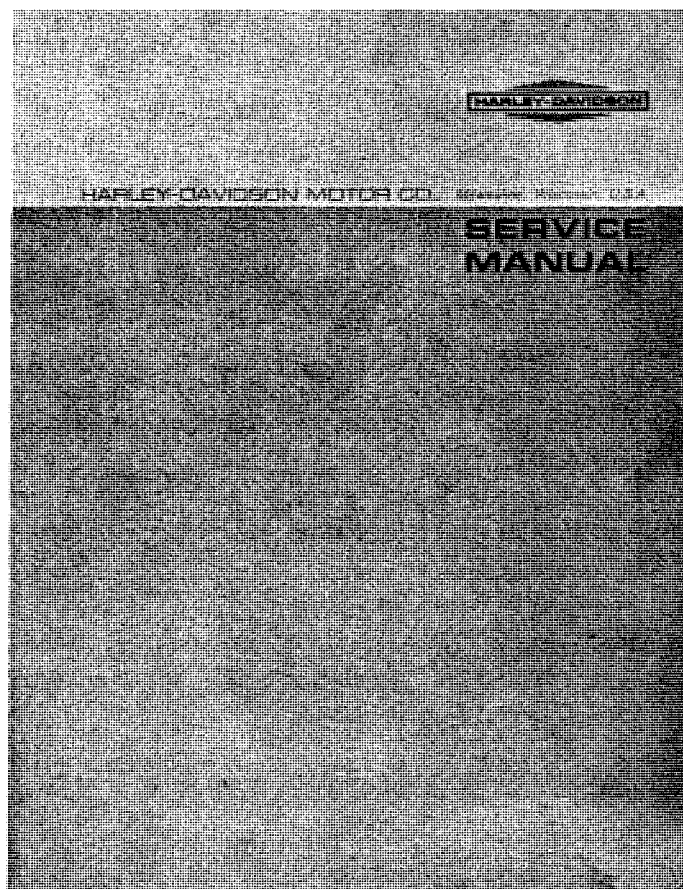

1966 SERVICE MANUALS**CONFIDENTIAL**

This service bulletin supplies service manual information for the current model season for all models except gasoline and electric cars which are handled in a separate service letter.

Two types of manuals are being supplied - the complete service manual and the service manual supplement. The complete manual covers 1959 to 1966 models. The service manual supplement (not a complete manual) is for converting earlier service manuals - so they will cover current models. The master service manual, which included all models combined, is no longer available. This manual was discontinued because the addition of more models to the Harley-Davidson line has made the manual too large.

If desired, your existing master service manual can be brought up to date by using pages from the individual 1966 service manual supplements.

Order complete service manuals covering 1959 to 1966 models, or order 1966 service manual supplements to bring your older manuals up to date, according to part numbers and descriptions listed below.
