

DISC BRAKE CALIPER MOUNTING PIN/FL,FLH,FX,XL,XLCH

A bolt-on brake caliper mounting pin is available for repair of the riveted type pin if it becomes loose or damaged in the brake outer caliper, part No. 44105-72.

Repair involves drilling or grinding off the riveted end of the original pin, removing it, enlarging hole and bolting on the stud type replacement pin.

Order your requirements of Caliper Mounting Pin Replacement Kit under part No. 44331-73.

A kit instruction sheet is enclosed for your information.
