

SPARK PLUG/1975-1976 SS,SXT-125

Harley-Davidson No. 7-8 spark plug was used on 1975 SXT-125 motorcycles, but was found too cold for normal operating conditions, therefore the No. 7 spark plug was used on 1976 SS/SXT-125 models.

The No. 7 spark plug should be substituted for the original equipment No. 7-8 spark plug on all 1975 SXT-125 customer motorcycles to provide satisfactory performance.

The No. 5-6 spark plug is not recommended for any 1974 to 1976 125 models because of the probability of damage to the piston from overheating.

Following are spark plug recommendations for 1968 and later 125's:

<u>Year</u>	<u>Model</u>	<u>Spark Plug</u>	<u>H-D P/N</u>
1968-73	ML, MLS, TX-125 (cast iron cylinder)	#5-6	32309-69
1974-75	SX-125 (aluminum cylinder)	#6	32309-66
1975-76	SXT/SS-125	#7	32306-61
