

## LOW COMPRESSION PISTONS / 1980 80 CUBIC INCH MODELS

Low compression piston assemblies are now available for the 80 cubic inch (1340cc) models produced 1980 and later. There is no carburetion change required to install these pistons, and they will enable the motorcycle to run on lower octane fuel because they reduce detonation.

The pistons are now available from the Parts and Accessories Division under the Part Numbers listed below.

**NOTE**

*Installation of these piston assemblies is not covered under Warranty.*

PISTON ASSEMBLY	SIZE	80 CUBIC INCH MODEL USAGE	INCLUDES PISTON RING SET
21990-80	STANDARD	1980 AND LATER	22334-78A
21991-80	.010 O.S.	1980 AND LATER	22335-78A
21992-80	.020 O.S.	1980 AND LATER	22336-78A
