Safety Recall Code 0130

May 3, 2007

2007 SOFTAIL BATTERY CABLE ROUTING RECALL

Purpose

Harley-Davidson has determined that a condition affecting motor vehicle safety exists on certain 2007 Softails. These vehicles were built with a condition that permits the positive battery cable to contact a weld bead on the oil tank. This may cause the weld bead to abrade through the insulation on the cable and cause an electrical short from the battery through the oil tank and oil lines. This could lead to an oil leak and/or possible fire, which could result in injury or death to the rider.

In the interest of motor vehicle safety and customer satisfaction, Harley-Davidson has elected to initiate a voluntary recall (0130). Recall consists of installing a battery caddy which includes a cable routing channel and protective shield preventing the possibility of contact between the positive battery cable and the oil tank weld bead. You may sell **but not deliver** any affected motorcycles to your customers until the remedy is completed.

Motorcycles Affected

This recall applies to all 2007 Softail motorcycles built from 6/8/06 through 3/14/07. A VIN list specific to vehicles shipped to your dealership is available via h-dnet.com and is no longer attached to mailed bulletins. This list may be found by following this path:

h-dnet.com/Service/SafetyCampaignandProductCampaign/SafetyCampaign and Open VIN lists. Select 0130 campaign to view VIN list.

NOTE

If the vehicle does not appear on your dealer VIN list, refer to Safety and Product Campaign History by VIN link to verify if vehicle is affected.

Customer Notification

In accordance with Federal regulations administrated by NHTSA, Harley-Davidson Motor Company, Inc. will provide notice to all owners of record of affected products with direction to bring the vehicle in for the recall service.

To protect the safety of our riders, it is our mutual responsibility to ensure the recall service is performed on all affected motorcycles. Therefore, we strongly urge you to perform the recall service even if the motorcycle was not purchased from your dealership.

You are also required to perform the recall service on all affected vehicles in your dealership inventory prior to delivering, renting or leasing those vehicles.

If you are not sure that a safety recall has been completed on a particular motorcycle, check the recall records available on TALON and h-dnet.com.

IMPORTANT NOTE

Because only registered owners will receive notification from us, we request that you contact any owners of vehicles that your records show as unregistered. Advise them of the safety recall and make arrangements for them to come in for recall service. We also require that you provide us with their names, addresses and V.I.N.s as soon as possible to enable us to mail them an owner's letter, as required by the National Traffic and Motor Vehicle Safety Act (as amended).

Kit Ordering Information

Initial wave shipments of replacement parts (Part No. 94547) will be made the week of April 30, 2007.

All kits will be shipped no charge, transportation paid via UPS1.

If additional kits are needed, fill in the attached order form and fax it to the Warranty department at 414-343-8346. You must include your dealer name, address and dealer number.

NOTES

- *No kit orders will be accepted prior to the termination of the wave shipment date. Orders received prior to the termination of the wave shipments **will be discarded**. A termination notice will be sent.*
- *Upon completion of the recall on any vehicle, please be certain to follow the instructions listed under "Credit Procedure" and submit your recall claims promptly.*

IMPORTANT NOTE

In the interest of preserving customer safety and satisfaction, always check for outstanding recalls whenever any motorcycle is brought into your dealership for either maintenance or service.

Required Dealer Action

NOTE

Refer to the 2007 Softail Models Service Manual (Part No. 99482-07), which contains instructions on removing and installing battery.

1. Remove seat.

⚠ WARNING

Disconnect negative (-) battery cable first. If positive (+) cable should contact ground with negative (-) cable connected, the resulting sparks can cause a battery explosion, which could result in death or serious injury. (00049a)

2. Remove battery. Remove battery cushion (part number 66210-07) from battery. Discard cushion.
3. Inspect positive battery cable. Replace positive battery cable if there is any chafing or damage. (Submit a properly completed "MC" claim for replacing any chafed or damaged battery cables following normal warranty procedures.
4. See Figure 1. Reposition positive battery cable routing at starter. Cable must face 35° forward from left side of vehicle $\pm 10^{\circ}$.
5. Loosen starter nut and adjust positive cable to proper orientation. Tighten starter nut to 70-90 in-lbs (7.9-10.2 Nm).
6. See Figure 2. Clip battery caddy to front of battery tray. Be sure tabs (2) of caddy fit over rear of battery tray (3).
7. See Figure 3. Install positive battery cable (1) into clip in caddy. Be sure S-shaped bend (3) in cable is present and cable conduit (2) is positioned adjacent to terminal as shown.
8. Route rear oxygen sensor harness (4) through clip (5).

⚠ WARNING

Connect positive (+) battery cable first. If positive (+) cable should contact ground with negative (-) cable connected, the resulting sparks can cause a battery explosion, which could result in death or serious injury. (00068a)

9. Install battery. Tighten battery terminal fasteners to 60-96 in-lbs (6.8-10.9 Nm).

⚠ WARNING

After installing seat, pull upward on seat to be sure it is locked in position. While riding, a loose seat can shift causing loss of control, which could result in death or serious injury. (00070b)

10. Install seat.
