

Tech Tips #57

PISTON FITMENT

Please make a change to your 2004 Genuine Motor Accessories And Motor Parts catalogs, page 452. The Head Type chart implies part number 22851-99A flat top piston will fit with all four head designs. This is incorrect. The SE Big Bore Flat Top Cast Pistons, part numbers 22851-99A, 22852-99A and 22853-99A, cannot be used with any HTCC heads (standard or ported) because of insufficient clearance between valve diameters and the stock, unmodified piston. The listing for the piston kits on page 455 is correct.
