

2003 Radio

Our new 2003 radio now has a CD player and CB and intercom switches in the radio face. There are numerous internal changes also which make **two very different versions** of this new radio, one for Ultra and the other for non-Ultra. In the past you could send a radio to RSI and have it upgraded to an Ultra style. This is no longer possible. A 2003 non-Ultra radio cannot be returned to RSI for an upgrade. This has made upgrading a non Ultra motorcycle to an Ultra configuration much more difficult and expensive than in the past. The radio, harness and speakers would have to be replaced and the labor associated with the change would be incurred as well. Since we did offer an easier, less expensive upgrade capability for 1998 - 2002 radios we wanted to eliminate any confusion on the 2003 models.
