2006 Calibrations

The ECM in all 2006 model year motorcycles has changed. With that in mind all the calibrations have also changed. Do not change the motorcycle configuration until the calibration you need is available. Please refer to the "Calibration Information" listings on h-dnet for the latest downloads. In these charts you will find approximate release dates of the calibrations. It would also be recommended to check the part number at that time to make sure it is available. The "Race Only" Screamin' Eagle Pro EFI Race Tuner is also not available for the 2006 ECM at this time. The 2006 replacement ECM part number is 32534-05A.
