

TT235 – March 7, 2006

103 Stage 1 Street Legal Calibrations

The new version of Digital Technician Software (Version 18.03) has the 103 Stage 1 Street Legal Calibrations listed under the 8° injector calibrations. This is incorrect and will be updated in a future software release for Digital Technician. These two calibrations have always used the 25° angle cone spray fuel injector. In the meantime, if you need calibration #32876-06B/DT or #32467-06B/DT you simply choose the 8° injector and you will see the calibration.

Note:

1. The 2006 FLHTCUSE and 2006 FLSTFSE2 CVO models have always had 25° injectors.
2. The Screamin' Eagle 103 Cubic Inch Stage 1 Street Legal kits (Part #'s 29877-06, 29876-06 & 29856-06) have 25° injectors included in the kit.
