

## Service Bulletin M-1186 & P&A Active Exhaust

### Service Bulletin M-1186 Information

1. Please read the entire bulletin.
2. Table #1 is the OEM calibration's (Except CVO) and may be performed now.
3. Table # 2 is the Street Legal Stage and CVO calibrations. If you have a vehicle that is involved in this Product Program and the calibration is listed in Table 2 of the bulletin, **DO NOT** perform the calibration upgrade until Digital Technician Version 20.xx becomes available in late December as stated in the bulletin. There will be **no reimbursement** if the download is performed before this release of Digital Technician.
4. Unlike the normal procedure for calibration reimbursement, this product program will not require an authorization for calibrations in table #2.
5. This bulletin only pertains to the Street Legal Calibrations.
6. **If the motorcycle has an EFI Race Tuner installed (for off road use only) Product Program 0903 does not apply. In this case, please send a fax to 414-343-8346, Attn: Hector, with your dealer number, VIN number and a brief note stating that the bike is Race Tuned and we will close the Product Program for that specific VIN.**
7. **If Stage 1 kit and calibration upgrade have been purchased and installed on a vehicle requiring the Product Program and it is the latest calibration then you will not need to perform the Product Program. In that case, please send a fax to 414-343-8346, Attn: Hector. Make sure to include you dealer number, VIN number and part numbers of Stage 1 kit and calibration and we will close the Product Program for that specific VIN.**

### P&A Active Exhaust Kit

Please be aware that the function in Digital Technician to enable or disable the P&A Active Exhaust system for the 2007 Models will not be available until the release of Version 20.xx in late December.
