

## 2007 Sportster Main Wiring Harness Change

As previously communicated in Service Bulletin M-1203 there has been a change to the 2007 XL main wire harness. The parts manuals do not correctly list both early and late part numbers.

The **Early** part number is **70224-07** and was used in production thru **1/30/2007**.

The **Late** part number is **70181-07** which has been used in production since **1/31/2007**.

Make sure to correctly identify and order the correct harness for your application as they are not interchangeable.

The pictures below from Service bulletin M-1203 show the differences between Early and Late harnesses.
