

VRSC Fuel Module Assembly/ Fuel level Sensor

If you need a 2007-2008 V-Rod Fuel Level Sensor, (**75210-07A**) it is available separate from the Fuel Module Assembly, as shown on pages 102 and 103 item **24**, of the 2008 VRSC Parts Catalog (99457-08A).

The Fuel Module Assembly (**75310-07**), item **28** as shown on pages 102 and 103 of the 2008 VRSC Parts Catalog (99457-08A) does not contain the Fuel Level Sensor.

The entire Fuel Module Assembly is a restricted part that seldom requires replacement, as individual parts are available separately. You will need to call Tech Service to order this part.

Please take note that the Fuel Level Sensor does not require Technical Service approval and can be ordered through your normal parts procurement procedure.
