Kit Number 42350-96

FRONT MASTER CYLINDER COVER KIT

General

This kit fits all 1986 through 1995 Harley-Davidson model motorcycles.

There are no service parts in this kit.

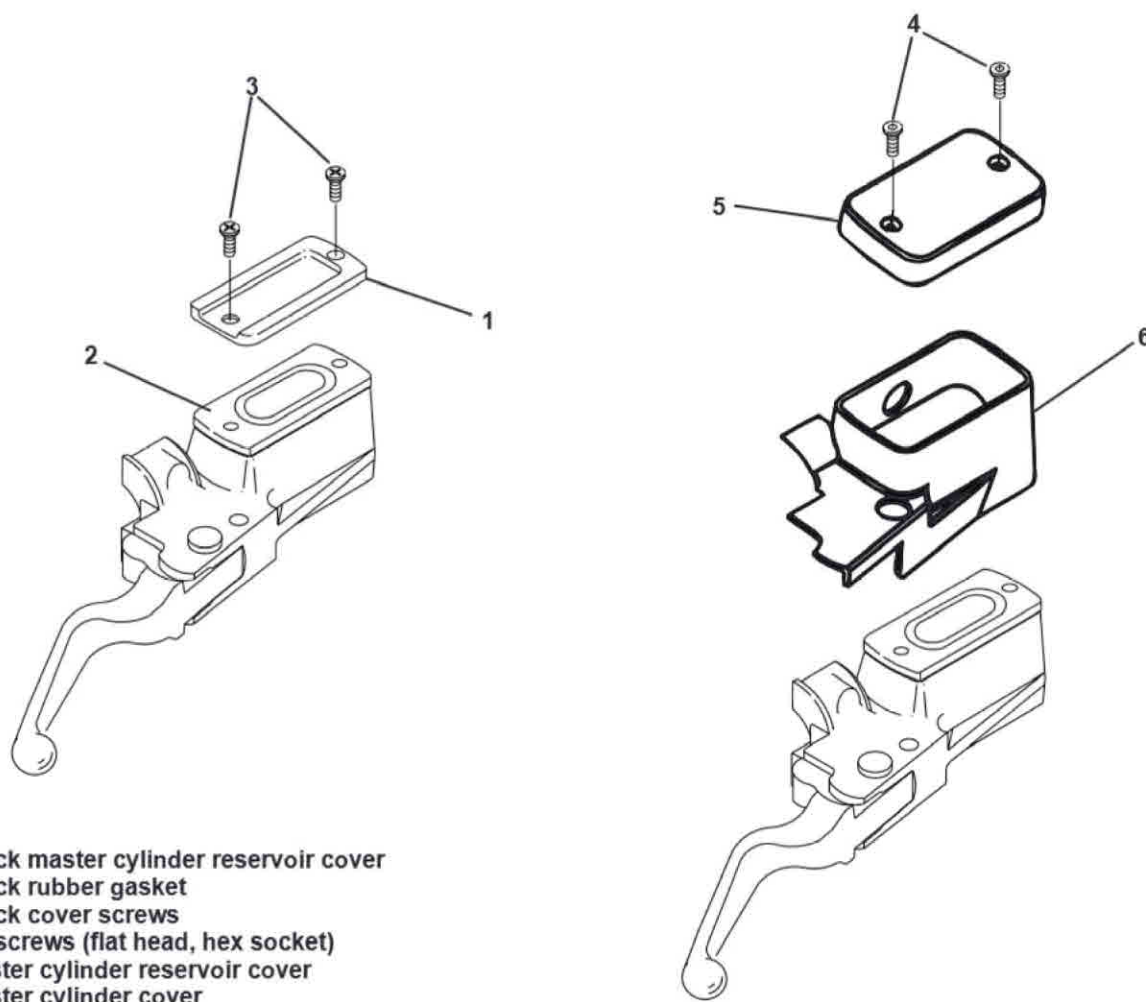

Installation

To prevent dirt and other contaminants from entering the master cylinder, thoroughly clean the cover before removal.

1. See illustration below. Remove right mirror. Remove screws (3) and stock master cylinder reservoir cover (1), but leave rubber gasket (2) in place. Take care not to spill brake fluid.
2. Place master cylinder cover (6) in position and press cover down fully. The small round hole in the cover should line up with the mirror stem mounting hole in the master cylinder.
3. Install the master cylinder reservoir cover (5) with the screws (4) from kit. Tighten screws to 10-15 in-lbs (1.1-1.7 Nm)
4. Reinstall right mirror.

i01017

1. Stock master cylinder reservoir cover
2. Stock rubber gasket
3. Stock cover screws
4. Kit screws (flat head, hex socket)
5. Master cylinder reservoir cover
6. Master cylinder cover
