Kit Number 37950-98

SCREAMIN' EAGLE PERFORMANCE CLUTCH KIT

General

This kit fits 1990 to 1997 1340 models and 1991 and later XL models. This kit replaces the stock eight paper friction discs with nine Kevlar friction discs and a higher rate diaphragm spring.

NOTE

A Service Manual for your motorcycle is available from your Harley-Davidson Dealer.

Installation Notes

Refer to the applicable Harley-Davidson Service Manual for installation of friction discs and diaphragm spring in kit, but follow these important guidelines:

- The nine friction discs and eight spacer discs in this kit replace the original eight friction discs, six spacer discs, and spring disc.

CAUTION

The spacer discs supplied in this kit must be used with the kevlar friction discs. Do not use the original spacer discs with this kit. Doing so will effect the stacked height of the clutch discs resulting in clutch slippage.

CAUTION

Do NOT use the spring disc with this kit.

- Remove the original eight friction discs, six spacer discs, and spring disc from the clutch assembly as described in Service Manual, and replace them with discs from kit. Place a friction disc into the clutch shell first, then alternate spacer discs and friction discs.
