REV. 7-28-2004

Kit Number 74624-01, 74627-01

## CHROME OIL COOLER COVER

### General

Kit number 74624-01 fits 2000 and later Softails (all) equipped with Oil Cooler Kit Number 62913-00B

Kit number 74627-01 fits 1982 and later XL's (all) equipped with Oil Cooler Kit Number 62874-99 or 62996-04

**Harley-Davidson High Performance Sealant, Part Number 99650-02 must be purchased separately to install this chrome cover.**

### Installation

1. Thoroughly clean the oil cooler of all dirt, grease and wax. Alcohol can be used to clean the oil cooler. Be certain that the chrome cover is dry and free of dirt, oil or grease. Alcohol can be used to clean the chrome cover.
2. See Figure 1. Apply sealant to the inside of the chrome cover as shown.
3. Slip the cover over the oil cooler. Remove any excess sealant from the front and back of the oil cooler. Care should be taken to avoid getting the sealant on the fins of the oil cooler. Hold the chrome cover firmly in place for one minute.

#### NOTE

Do not drive the motorcycle for 24 hours to allow the adhesive to fully cure.
