ORIG. 9-94

REAR FLOATING BRAKE DISC KIT

General

This kit is designed to fit all late 1987 and later XLH, FXR, Dyna and Softail models.

This kit includes the following:

QTY	DESCRIPTION
1	Brake disc, floating, rear
5	Screw, pan head

⚠ CAUTION

This brake disc must be used **ONLY** with brake pad kit Part No. 44209-87C. If you don't use these brake pads, the disc will be damaged and its useful life shortened.

Brake pad kit 44209-87C is original equipment on 1992 and later models. 1991 and earlier models must use 44209-87C brake pads. These pads are identified by the number 56 stamped into the outside brake pad backing surface, opposite the friction material.

Qty	Description	Part Number
1	Brake pad set, rear	44209-87C

Installation

1. See the appropriate Service Manual for all removal, assembly and disassembly procedures.

NOTE

The floating disc screw holes are countersunk to accept the retaining screw heads. Be sure you install the screws properly.

2. Assemble brake disc and pads as described in appropriate Service Manual.
3. See Service Parts Illustration. Install new pan head screws. Tighten screws to torque values given in Service Manual.

⚠ CAUTION

If possible, avoid hard stops for 300 miles. Hard stops during the wear-in period will gall discs.
